

The faculty, administration and staff are working tirelessly here at the School of Nursing to assure that we provide you with the best possible academic experience whether you are just starting your journey, or you are returning to continue your studies. The challenges of the global pandemic is casting a sense of uncertainty on what we consider “normal.” None of us knows exactly what the future will bring, but at the School of Nursing, we do know that we are committed to helping you achieve academic success. After thoughtful consideration of the current circumstances, we have made the difficult decision to temporarily change the way we deliver our courses.

For the Fall of 2020, BHSON classroom content will be delivered virtually, with live classes being delivered via video conferencing (we use Google Meet). Clinical will be a combination of in person clinical in small groups at our clinical agencies, in person simulation and skills lab time, and virtual clinical experiences. Faculty will offer support through virtual office hours.

We will be working diligently to minimize the risk of infection transmission, including frequent sanitation of high touch surfaces in the building, screening those who enter, requiring students and faculty to wear surgical masks, and maintaining social distance.

We are confident that we can all rise to this challenge and work together to help you reach your goal of becoming a Registered Nurse. Classes are scheduled to start August 17th.

Best,
Jean
